"In 2013, there was a significant correlation between large projects hitting the platform and smaller projects getting more support. The big projects were bringing more visibility to the smaller ones. This behavior has now gone apparently. According to [name]'s analysis, the \$50k-\$100k bracket has been the hardest hit, with just ten games getting funding so far this year compared to 54 in 2014 entire. In addition, rather than the general standard of submissions improving and increasing cashflow as a result, [name] says more and more low quality games are being submitted, resulting in a rise in the number of games which attract no backers whatsoever."
